PRINCIPLES

FOR CONSIDERATION OF PROPERTY TAX ABATEMENT IN LAFAYETTE, INDIANA

These principles are used in determining the guidelines and considerations for each category of project, and will also be used in determining the length of an abatement within each category.

1. Firms receiving tax abatement are expected to give local construction firms and local suppliers of goods and services the opportunity to do business.
2. Existing industry will be considered for tax abatement on the same basis as firms being recruited to the community.
3. Preference will be given to firms that diversify and fill gaps in our local economy rather than those that compete for business in the local economy with existing firms.
4. Products that are sold outside our local community and bring value to the local economy will be given a high priority.
5. Abatement will be used to recruit and assist firms that create a technology based product or service or use advanced technology in manufacturing.
6. Location in the downtown, the urban enterprise zone, or declining area designated as an economic development area will be given a higher priority.
7. Projects that involve retail or are primarily office operations will be considered only in the locations described in #6 above unless the office operations are technology related.
8. The number of jobs created per dollar of investment will be an important consideration for the warehouse distribution and manufacturing areas.
9. The level of wages and benefits will be an important consideration for all applications.
10. Housing will be evaluated in terms of percentage of units available to lower income families, mix of income levels, distance from other projects serving a similar clientele, availability of services, potential displacement of existing housing, and compatibility of design.
11. Projects will not be considered that will require variances or special exceptions unless primary review indicates that no problems will be encountered.
12. Adverse environmental impacts will negatively affect the consideration of abatement.
13. Any need for additional public infrastructure or other additional public support in the project will be considered in determining the length of the abatement.
14. Major development projects will be individually evaluated.
15. The time period of depreciation of equipment will be considered in the length of abatement for equipment.
16. Economic Revitalization Areas (ERAs) designated by the Common Council for new manufacturing equipment will include a Memorandum of Understanding that will provide for the repayment to the City of all or a portion of the tax savings realized through the designation in event that the ERA is terminated because the new manufacturing equipment is removed from the City.

GUIDELINES

FOR CONSIDERATION OF PROPERTY TAX ABATEMENT IN LAFAYETTE, INDIANA

Projects will be considered for abatement only if the proposed investment is at least \$250,000 and development has not begun and/or equipment has not been ordered. In addition, if the applicant is not the owner, authorization of the application must be obtained from the owner.

The length of the abatement period for real estate and equipment will be considered by the guidelines in the categories below:

6-10 Years

Real Estate Improvements

Manufacturing

Technology Based

3-6 Years

Equipment and Machinery

Warehouse/Distribution

Office
