City of Lafayette Offering Media Tour Inside Greenbush CSO Underground Storage Tank

Lafayette, Indiana – As the finishing touches are put on the Greenbush Combined Sewer Overflow underground storage tank, the City of Lafayette is offering the media an opportunity to view the tank from the inside. The 4.2 million gallon tank is roughly the size of an NFL football field and will soon be utilized to capture untreated sewage during heavy rain events. Construction on the tank began in October 2017; this will be the last time visitors will be allowed to enter the tank before a 9-foot diameter pipe is connected and the tank is put into use.

Representatives from Lafayette Renew and Bowen Engineering will be on hand to answer questions and to give an overview of the project.

Mark your calendars for this unique opportunity at **650 Marion Street, Friday, January 18, 2019 at 10:00a.m.** Please wear appropriate safety gear to tour this active construction site.
