### **City Holds Ribbon Cutting for Murdock Park Booster Station** *Booster Station and Underground Reservoir to Advance Water Service*

LAFAYETTE, INDIANA – November 8, 2022 – The City of Lafayette held a ribbon cutting event today for the Murdock Park Booster Station, the newest component of the City’s 25-year infrastructure master plan, a water booster station and underground storage reservoir.

Located at one of the highest points in the city, the six-million-gallon-per-day booster station and three-million-gallon reservoir will serve as a supplemental source of water for the City’s Upper Water Zone and as a backup pump facility for the Columbian Park Booster Station. Water Works Superintendent Steve Moore explained that the new 24” and 30” water main extensions, working in conjunction with the new booster station, will help meet the demand for many years to come and will provide much needed redundancy.

Mayor Tony Roswarski highlighted the importance of the development, saying, “This project represents an important step in our overall infrastructure plan. We are mindful of the crucial role water quality and fire protection plays for every citizen, business, and manufacturer, and we remain committed to supporting and attracting residents and industries with these improvements to our city.”
