

Downtown Way-finding Kiosks

Lafayette’s Downtown Way-finding Kiosk program is a joint project among the cities of Lafayette, West Lafayette, and Visit Lafayette-West Lafayette, our local tourism bureau.

To date, twelve Kiosks have been placed throughout the Lafayette’s downtown, starting in 2010. The Kiosks serve multiple purposes with a map to help people unfamiliar with downtown find their way and business listings to different shops and restaurants for visitors new to the area. Their placement has been carefully considered to guide visitors upon entrance to the district as well as once inside the districts of downtown Greater Lafayette.

The Kiosks are internally illuminated for nighttime use and the design has been coordinated with other amenities that have been recently installed downtown; metal benches, decorative street lamps, and neighborhood and district signage that all feature dark, ornate metal accents that add to the historic character of Greater Lafayette’s downtown. The Kiosks are updated twice a year through Visit Lafayette-West Lafayette tourism bureau. For more information or to contact someone about the kiosks;
