Lafayette, IN 47901

John,

It has been brought to my attention by fire crew that work in the North end of Lafayette that they are having continued difficulties moving through Maple St. between 18th and 20th St. because of cars parked on both sides of the street. I have included a picture of the situation. Maple St. is 23 feet 8 inches wide. Meharry St. just to the North of Maple is 31 feet wide. This condition makes it very difficult to operate under fire conditions. I would recommend that the North side of Maple have no parking.

Thank you for your considerations

Respectfully Submitted
